6.2 The Permit Holder shall not on any one day exceed or be in possession of more than the stipulated Linefish bag limits, therefore daily bag limits may not be accumulated over the duration of a trip, thus for all practical purposes daily bag limits are also trip limits.

7. HANDLING OF OVER/UNDER CATCHES AND PROHIBITED SPECIES

7.1 No upper limit is set on total landings for the Traditional Linefish commercial fishing sector except the species-specific bag limits. No prohibited species may be landed whilst operating in terms of the permit.

7.2 In the event that the Permit Holder catches any fish which may not be landed or possessed, such fish must be returned to the sea immediately, irrespective if it is dead or alive.

7.3 All incidentally caught fish/animals which may not be landed should be treated according to best practice to increase post-release survival. Sharks that are incidentally hooked during linefishing in proximity to shark cage diving operations should be handled in accordance with the best practice for shark release as set out in paragraph 7.4 of these permit conditions.

7.4 The Permit Holder must follow the best practice for shark release as set out below:

(a) for sharks above the slot limit (big sharks): Bring the shark to the side of the vessel as quickly as possible. Avoid taking the shark out of the water while releasing it from the line. Cut the line as close to the hook as possible.

(b) for sharks below the slot limit (small sharks): Bring the shark to the side of the vessel as quickly as possible. Keep the line under tension to avoid entanglement. Handle animal as little as possible, avoid contact with eyes and gills, and preferably handle with wet hands/gloves. Support the weight of the animal if removed from the water, and do not hold by its tail. Cut the line as

close to the hook as possible if the barb of hook is not visible, or if handling the hook is unsafe. If correctly hooked, and removal of the hook is safe and the barb is visible, cut the line and remove hook in the direction of the tip.

8. VESSEL SPECIFICATIONS

8.1 The Permit Holder shall only utilize a vessel that is compliant with all requirements as determined by the South African Maritime Safety Authority (SAMSA).

8.2 The Permit Holder shall not use the nominated fishing vessel unless it bears the registration letters and numbers assigned thereto by the Director-General. Such letters and numbers shall be painted in white on a black background or in black on a white background on both bows in characters not less than 15 cm in height, 10 cm in breadth (figure "1" excepted) and 2 cm in thickness (width of stroke). The space between adjacent letters and figures shall be between 2 cm and 5 cm.

8.3 The Permit Holder shall display, on the vessel next to the registration letters and numbers (area number) assigned to the vessel by the Director-General, the letters " **LT**" (Traditional Linefish) followed by the number of crew and the zone of operation reflected in Section A of the permit (e.g. **CT415 LT 8 ZB**).

8.4 Only the SAMSA approved measurement is regarded as the "vessel length".

9. VESSEL MONITORING SYSTEM

9.1 The Permit Holder shall ensure that the fishing vessel is fitted with a functioning vessel monitoring system (VMS), which is approved by the Department.

9.2 It is the responsibility of the Permit Holder to ensure that the VMS is fully operational and that the VMS continues to transmit to the Department's Operations Room prior to sailing and throughout whilst at sea.

9.3 The Permit Holder shall establish that the VMS unit is functional by contacting the Operations Room during office hours via e-mail at: VMSops@dffe.gov.za or telephone on: 021 402 3077/76, prior to sailing. Should the power supply be interrupted, or the equipment become non-functional (for

whatever reason), and the problem persists, the vessel shall proceed to port within twenty-four hours of becoming aware of the problem.

9.4 In cases where VMS units are non-functional due to "technical" problems, and the Permit Holder wishes to proceed to sea without a functional VMS unit, the Permit Holder shall obtain prior written permission from the Department.

9.5 Only when written permission has been received from the Department shall the vessel proceed to sea. The permission to operate without a functional VMS shall be kept onboard the vessel for the duration of each trip undertaken within the period of validity of the permission.

10. LANDING OF FISH

10.1 The Permit holder must inform the Fishery Control Officer either by fax, SMS or phone of the intended time of landing and the port/slipway where the landing will take place.

10.2 The Permit Holder shall ensure that all fish is discharged from the vessel in accordance with the instructions of the Fishery Control Officer; Marine Resource Monitor; or Law Enforcement Officer where applicable.

10.3 Launching activities and landing of catch shall only be undertaken at approved landing points within the zone of operation and the entire catch shall be discharged at one landing point (Table 3).
