

# WHAT IS RECYCLING?

*Recycling* means taking the materials from products you have used and using them to make new products. We should all try to recycle because it uses up fewer resources, saves money, uses less energy and it results in less pollution.

There are *many* things you can recycle such as paper, glass, plastics, certain metals, and polystyrene.

*Paper products* can include magazines, newspaper, milk and juice boxes.

*Glass and plastic products* can come from containers, jars and bottles.

Other types of *recyclable waste* comes from building, household and garden refuse.

What else can you do to help?

Use *recycling bins* and spread the word by telling everyone to stop littering. *Sell recyclables* to reward yourself and give back to your community and the environment by running *clean-up campaigns*.

COMMUNITY CLEAN UP! EVERYBODY WELCOME!

Always try to clean up your community to help save the environment!

Reduce . Reuse . Recycle . Recover

GOOD GREEN DEEDS

**Are you making a difference?**

Section 24 of the South African Constitution states: "Everyone has the right to an environment that is not harmful to their health or well-being."
