

WORKSHOP C

FORMULATING QUALITATIVE INDICATORS FOR REPORTING COMPLIANCE AND ENFORCEMENT IMPACT

“The EMI Evolution: Unlocking the Potential”

WORKSHOP OVERVIEW:

The Environmental Management Inspectorate shares its regulatory space with *odd bedfellows*. A typical example are Departments which imperatives are at odds with each other eg. Those that address both economic and environmental imperatives. As such, finances are usually distributed in areas which promotes other government priorities which may result in the Inspectorate within those Institutions not receiving its fair share. Quantifying the work of the Inspectorate through a qualitative indicators however provides a good starting point to ensure that the pendulum swings in our favour. This workshop will look at ways to promote consistency in reporting on a national level issues that are of interest to society in general.

OUTCOMES:

Understanding the elements which drives quantifying the impact of the Inspectorate through a qualitative assessment of the work that is done.

Who should attend?

EMIs/ Delegates who are at a middle and/or senior management level. EMIs and/ or delegates who has an interest in this field is welcome to attend this workshop.

WORKSHOP FACILITATORS:
