MINISTER

FORESTRY, FISHERIES AND THE ENVIRONMENT

REPUBLIC OF SOUTH AFRICA

GENERAL PUBLISHED REASONS FOR DECISIONS ON APPEAL IN THE HAKE LONGLINE SECTOR FISHING RIGHT ALLOCATION PROCESS 2021/2022

INTRODUCTION

1. These are the General Published Reasons for the Decisions on appeal in the Hake Longline sector: 2021/2022 by the Minister of Forestry, Fisheries and the Environment (Minister). This document is titled the "*General Published Reasons for Decisions on Appeal in the Hake* Longline *Sector-Fishing Right Allocation Process 2021/2022*" (the Appeals GPR).

2. The Appeals GPR is structured as follows:

   2.1 Introduction;
   2.2 Systematic/Cross cutting Grounds of Appeals;
   2.3 Quantum Allocation Methodology (QAM);
   2.4 Outcome of the Appeals;
   2.5 Conclusion; and
   2.6 The final allocation of commercial fishing rights in the Hake Longline sector is set out in **Annexures A**, **B** and **C** to the Appeals GPR.

3. During February 2022, the Department of Forestry, Fisheries and the Environment (the Department) completed the Fishing Rights Allocation Process of 2021/2022 (FRAP 2021/22), in the Hake Longline sector. Ms KSH Morake-Makhelemele; Director: Aquaculture Technical Services, published her decisions in respect of the FRAP 2021/2022 in the "*General Published Reasons for the Decisions on the Allocation of 2021/22 Fishing Rights and Quantum in the Hake Longline Sector" (GPR).*

4. Applicants who were dissatisfied with the Delegated Authority's decision were entitled to appeal against the decision(s) of the Delegated Authority, in terms of section 80 of the Marine Living Resources Act 18 of 1998 (MLRA), read with regulation 5 of the Regulations to the MLRA, via the Department's FRAP Appeals online system. The closing date for FRAP 2021/2022 appeals was 29 April 2022. In response to several requests from the fishing industry, the closing date was extended to 29 July 2022. The Department received two hundred and eighty (280) appeals in the Hake Longline sector across the different categories of applicants.

5. Appeals are governed by section 80 of the MLRA read with Regulation 5(3) of the Regulations to the MLRA, published under Government Notice R1111 in Government Gazette 19205, dated 2 September 1998.

6. This Appeals GPR addresses the issues raised in the appellants grounds of appeal, and it sets out how I, in my capacity as the Appeal Authority in terms of section 80 of the MLRA, dealt with these issues to determine and decide the appeals in general.

7. I note, at the outset, that in making my decisions on the appeals that have been submitted against the decisions of the Delegated Authority, I considered and balanced a wide range of factors. These include, but are not limited to, the following:

   7.1 The principles and objectives derived from the Constitution that are relevant to the FRAP 2021/2022;
   7.2 The principles and objectives of the MLRA as stated in section 2 thereof;
   7.3 The purpose and objectives of the 2021 General Policy on the Allocation of Commercial Fishing Rights: 2021 (the 2021 General Policy) read with the various sector specific policies on the allocation of commercial fishing rights: 2021 (the Sector Specific Policies);
   7.4 The need to broaden access to the fishing industry, by introducing new entrants to the various fisheries;
   7.5 The need for transformation of the fishing industry to achieve equity and to address historical imbalances;
   7.6 The desirability of multi sector involvement, facilitating participation through the value chain;
   7.7 The need to minimise negative impacts on the fishing industry, including instability or disruption of existing participation in job creation, and minimising job losses;
   7.8 The need for sustainable development of the natural resource through, among other, the determination of the Total Allowable Catch (TAC) and/or Total Applied Effort (TAE);
   7.9 The need to address the dynamics of each specific fishery;
   7.10 The need to minimise the risk of paper quota holders;
   7.11 The adjustments that need to be made where related entities have applied for rights in the sectors;
   7.12 The need to assess applicants within a category against other applicants in the same category so that new entrants are not unfairly prejudiced on certain criteria where existing right holders may score higher;

7.13 The desirability of giving successful applicants a reasonable prospect of active and meaningful participation in the fishery;

7.14 The Constitutional Court judgment in the matter of *Bato Star (Pty) Ltd v Minister of* Environmental *Affairs and Tourism and Others (CCT 27/03) [2004] ZACC,* which provides important guidelines for me to consider when I exercise my duties as gate- keeper of the Department of Forestry, Fisheries and the Environment (the Department).

8. In arriving at my decisions, I also had regard to the following:

8.1 The 2021 General Policy is a guideline document on the allocation and granting of commercial fishing in terms of section 18 of the MLRA. The granting of rights in the Hake Deep Sea Trawl section will be guided by the 2021 General Policy on the Allocation and Management of Commercial fishing rights read with the Sector Specific Policy on the Allocation and Management of Commercial Fishing Rights in the Hake Longline fishery: 2021 (the Sector Specific Policy).

8.2 The 2021 General Policy and the Sector Specific Policy are based on, among other, the Constitution, the MLRA, the Broad Based Black Economic Empowerment Act, 2003 (Act No. 53 of 2003) (BBBEEA), the National Empowerment Fund Act, 1998 (Act No 105 of 1998) (NEFA), the Promotion of Administrative Justice Act, 2000 (Act No 3 of 2000), the Promotion of Access to Information Act, 2000 (Act No 2 of 2000), and the Protection of Personal Information Act, 2013 (Act No. 4 of 2013) (POPI).

8.3 The 2021 General Policy and the Sector Specific Policy give effect to the objectives of the MLRA as listed in Section 2 thereof. The objectives identified in section 2 of the MLRA are the following:

(a) The need to achieve optimum utilisation and ecologically sustainable development of marine living resources;

(b) the need to conserve marine living resources for both present and future generations;

(c) the need to apply precautionary approaches in respect of the management and development of marine living resources;

(d) the need to utilise marine living resources to achieve economic growth, human resource development, capacity building within fisheries and mariculture branches,

employment creation and a sound ecological balance consistent with the development objectives of the national government;

(e) the need to protect the ecosystem as a whole, including species which are not targeted for exploitation;

(f) the need to preserve marine biodiversity;

(g) the need to minimise marine pollution;

(h) the need to achieve to the extent practicable a broad and accountable participation in the decision-making processes provided for in this Act;

(i) any relevant obligation of the national government or the Republic in terms of any international agreement or applicable rule of international law; and

(j) the need to restructure the fishing industry to address historical imbalances and to achieve equity within all branches of the fishing industry."

8.4 The objective of transformation of the fishing industry is a constitutional and legislative imperative. The primary vehicle for the promotion of the transformation of the South African fishing industry is the MLRA. Therefore, in exercising any power under the MLRA, regard must be given to the stipulated objectives and principles set out in section 2 of the MLRA with measures to achieve the objective to restructure the fishing industry, to address historical imbalances and to achieve equity within the fishing industry.

8.5 The assessment of appeals is undertaken per the different categories of applicants to ensure that new entrants are not prejudiced when compared to existing rights holders. Those applicants who held rights in the fishery for which they are re-applying during the period 2006 to 2020 are considered as Category A applicants. Applicants who held rights in sectors other than the fishery they are applying for during the period 2006 to 2020 are considered as Category B applicants. Applicants who did not hold commercial fishing rights during the period 2006 to 2020 are considered as Category C applicants. Category B and C applicants are also referred to as "new entrant" applicants.

9 In determining each of the appeals, I considered all relevant factors and the information before me, including but not limited to:

9.1 The Marine Living Resources Act, 1998 (Act No 18 of 1998);

9.2 The Regulations in terms of the Marine Living Resources Act;

9.3 General Policy on the Allocation of Commercial Fishing Rights: 2021;

9.4 The Policy for the Allocation and Management of Commercial Fishing Rights in the Commercial Hake Longline fishery: 2021;

9.5 The FRAP applications;

9.6 The Delegated Authority's GPR dated 28 February 2022;

9.7 The Delegated Authority's decision letters;

9.8 The Appeal forms;

9.9 Regulation 5 (3) reports; and

9.10 Relevant case law

10 Where necessary and appropriate, the Appeals GPR refers to individual grounds of appeal. However, the Appeals GPR does not respond to each appeal and to every allegation by individual appellants made therein. Specific grounds of appeals which are not addressed in the Appeals GPR, are dealt with in the individual appeal decisions that will be sent to appellants.

11 Each appellant in the sector will receive the following documents:

11.1 The individual Appeal Decision, incorporating the reasons for such decision;

11.2 Where applicable, a copy of the adjusted score sheet on appeal;

11.3 Entities who are allocated a Hake Longline right on appeal will receive a Grant of Right letter; and

11.4 The Appeals GPR will be published on the Department's website.

12 The Appeals GPR is final. However, the allocation of fishing rights is subject to the correctness of the assertions made and information submitted by the applicants / appellants, and performance reviews. If any information in the online application or online appeal process is found not to be true or complete, or if false information is provided, or material information is not disclosed, this may lead to the revocation, suspension, cancellation, alteration or reduction, in terms of section 28 of the MLRA, of any right, license or permit granted on the strength of the FRAP 2021/2022 application or appeal.

SYSTEMATIC/CROSS CUTTING GROUNDS OF APPEAL

Provision of new information on appeal

13 Section 8.4 of the 2021 General Policy regulates information to be considered during the application process and provides *inter alia* that:

> 8.1 Information to be considered
>
> 8.1.1 The approach set out below will be adopted by the Delegated Authority regarding information to be taken into account for assessing the applications:
>
> (a) ...
>
> (b) Late information
>
> Information submitted after closing date for applications will not be considered.

14 Whilst the provisions in the various applicable policies are couched in strict terms, I am aware that a policy serves as a guide to decision-making and cannot bind the decision-maker inflexibly. In this regard, I am guided by the Constitutional Court's judgement in the case of *Bato Star Fishing (Pty) Ltd v Minister of Environmental Affairs*[1] where the court held that an approach to procedural fairness requires that policy not be applied rigidly and inflexibly.

15 Moreover, appeals in terms of section 80 of the MLRA are regarded as wide appeals which entail a reconsideration of the application and may include consideration of additional information.

16 In light thereof, where appellants sought to provide additional information to their application forms, on appeal, based on the wide powers afforded to me in my capacity as the Appeal Authority, I considered such further information, provided that the information was in existence at the time when the appellant submitted its original application. This was to ensure that the fairness of the competitive process was not compromised.

[1] (2004 (7) BCLR 687 (CC).

Calculation of Scores

17 Several applicants argued that they were not able to test the correctness of the scores which the Delegated Authority allocated to on certain aspects of the application form because they were not clear on how these scores were calculated.

18 In my view, the Delegated Authority provided sufficient information on the calculation of scores. These are set on the Delegated Authority's GPR, read with the scoresheets.

19 Nevertheless, I have set out below the manner in which the calculations were applied. In addition, an excel file will be published on the DFFE website, which sets out each step in the calculation of scores.

Section 5- Fishing Performance

19.1 Fishing performance was calculated by summing the catches across all the years submitted by an applicant and by then dividing this sum by the sum of the applicant's previous allocation for the same years (length of right varied due to right transfers) and by then multiplying the result by 100 to produce a percentage score. Points were allocated on sliding scale based on the performance percentage.

Section 6: Transformation

19.2 Question 6.3- The calculation is based on the increase in transformation from the start of the right to 2020 and considers an entity's level of black ownership as well as ownership by women, youth, and disabled people. The values provided for "Black People", "Women", "Youth" and "Disabled persons" were summed for 2006 and 2020, separately as the start and end values and then compared to determine if there had been an increase in transformation. On checking these calculations, it was discovered that applicants with a zero transformation as at 2006, were scored 100% as their increase in transformation between 2006 and 2020. This was because it is not possible to divide any number by zero. I accordingly replaced these 0's with 1 to address the anomaly and gain an accurate reflection of transformation by the applicant.

19.3 Question 6.6- In the DA's GPR (page 30), it is stated that the "Applicants were evaluated for their contributions to Employee Share Schemes. Applicants that did not have Schemes in place or where Schemes were not applicable were allocated scores of zero." However, in the table associated with this text it is recorded that applicants that reported share schemes of **0**-10% would receive a score of 1. This created inconsistencies in scoring. In order not to prejudice any applicant, I applied a minimum score of 1 consistently to applicants who had no share scheme or who had responded yes to share schemes but provided no % values on this aspect, or where schemes were not applicable, were allocated scores of zero (0). scored entities with no

19.4 Question 6.7- Applicants were asked to provide information on Capital Payments they had made to Employee Ownership Schemes for the five years from 2016 to 2020. For each year that an applicant provided information on payments made to the scheme the Delegated Authority scored an applicant 2. For each year that an applicant made no payment and/or provided no information on such payments, the Delegated Authority scored the applicant zero. To achieve consistency, I scored each applicant 1 for each year that an applicant made no payment and/or provided no information on such payments and a score of 2 for each of the five years where an applicant provided a payment value. In total an applicant could score a minimum of 5 and a maximum of 10.

19.5 Some appellants argued that questions 6.5 and 6.7 in the application form favour "longer and larger" enterprises and have the effect of marginalising previously disadvantaged groups. The Delegated Authority, in the Regulation 5(3) reports, stated that Appellants were scored based on the 2021 General Policy and Sector-Specific Policy which provide that an applicant's empowerment profile and employee service record will be considered, specifically regarding black people, female, youth, and persons with disabilities (Clause 7.1.8 (f)(iii)). I am satisfied that the applicable policies fairly address the issue of transformation. There may be merit to the Appellant's argument that certain questions, as parts of the balancing criteria, may favour larger companies who have a bigger staff compliment. However, there may well be other balancing criteria that may favour smaller companies. It should also be borne in mind that applicants compete with other applicants within their category, only. I note specifically that Category C applicants were only compared with Category C applicants, some of whom were able to successfully demonstrate meeting

these kinds of larger employee benefits. In a competitive process, it is necessary and reasonable for applicants to be assessed on their ability to create meaningful employment and other societal benefits for their employees, as a way to gauge their intention to participate in the sector and in transforming the sector, if allocated a right. Nonetheless, the Delegated Authority took cognisance in the fact that existing right holders will be in a better position than new entrants to demonstrate their abilities in creating certain opportunities. For this reason, Category C applicants are only compared with other Category C applicants on their scoring, ensuring no prejudice.

19.6 Question 6.10- Applicants were assessed on the percentage of their wage bill that was expended on Historically Disadvantaged Individuals. An applicants' percentage contribution to each of the Broad-Based Black Economic Empowerment (B-BBEE) categories (race, women, youth and disability) to its total wage bill was calculated. Each percentage per B-BBEE category was then allocated a score as per the table on page 31 of the DA's GPR. Each score for the four categories was then added to give a final score. The maximum score that could be attained for this question is 24. During the consideration of the appeals, I found that some applicants had reported more employees under a specific B-BBEE category than the applicant's total number of employees. This is logically impossible. To address this issue I adjusted the total number of employees upward to reconcile with the numbers reported per category. This approach ensured that no applicant was unfairly prejudiced.

19.7 Questions 6.11, 6.16, 6.17, 6.19, 6.21, 6.23, 6.24 and 6.26- The DA scored applicants that answered YES to these questions a score of five (5); and applicants that answered "NO", "N/A" or left their response BLANK, were awarded a score of zero (0). Some appellants argued that they are not "designated employers" per the requirements of the Act, and they are therefore not required to comply with the legislation relevant to these questions. I awarded these appellants the maximum of 5 points, where appropriate. In my view, it is neither fair nor reasonable to assess entities on criteria that they are not in law required to comply with. I applied this approach consistently to all questions that related to legislative compliance, where relevant. Question 6.26 on Enterprise Development was scored consistent with the information provided by the applicant.

19.8 Question 6.15: Applicants were requested to indicate what percentage of their annual turnover was expended towards Corporate Social Investment for the three-year period from 2019 to 2021. Applicants that answered "N/A" or left this question BLANK were scored a 0 (zero). For each year that the applicant contributed towards CSI, the applicant was scored a percentage on a sliding scale. The score for each year was added to provide a final score. The maximum score for this question is 9. The DA's GPR refers to question 6.15 instead of 6.14 – it is evident from both the application form and the scoring instructions that the correct reference is 6.15. The Technical Advisory Team, reviewed the Delegated Authority's calculations for 6.15 and, with one exception in Category C, the scores allocated by the Delegated Authority are correct for this question. I applied the same principle as with question 6.6, namely that I applied a minimum score of 1 consistently to applicants who had not contributed to Corporate Social Investment or who had reported yes but provided no values on this aspect.

Section 7- Job Creation

19.9 A scoring protocol was developed to score questions 7.1 (for permanent jobs) and 7.2 (for temporary/seasonal/part time jobs). The data used to calculate scores was limited to the information relating to the year 2020. On question 7.1 the DA scored applicants based on the Total Number of employees. The issue raised on appeal was that this approach unfairly favoured applicants that had a large number of employees in other sectors. I scored question 7.1 for each applicant based on the number of permanent jobs that the applicant holds per ton in the sector. For category A each applicants jobs per tons was divided by the maximum value of job per ton and multiplied by 100 to standardise the result as a percentage. For category B and C, each applicants' total number of permanent jobs was divided by the maximum number of jobs for in its respective category and multiplied by 100 to standardise the result as a percentage. Question 7.2 calculates the part time jobs per ton for category A and total number of part time jobs for category B and C using the same methodology.

Section 8- Dividends and Additional Societal Benefits

19.10 Question 8.4- Only Category A applicants were scored for question 8.4 where the benefit value was calculated using the specified formula:

0.55 x [Total Revenue Paid] + 0.3 x (([Number Shares Issued] x [Average Value of a Share]) + ([Total Annual dividends] - [Annual Dividend Paid to Black shareholders])) + 0.15x[Annual Dividend Paid to Black Shareholders]

The benefit values were then divided by the sum of the allocation (data submitted by the applicants) over the full period submitted and then normalised by scaling to the maximum benefit value per ton and multiplying the result by 100 to produce a percentage score. The Rights Registers per the Department's records was used to replace the allocation data for a second calculation to cross check the applicant's data. The Rights Register score was used as that better reflected the performance of the applicants for this question.

19.11 Question 8.6- Applicants were allocated points based on the following sliding scale depending on the number years the entity has been operating in its local area: 1-5 years=5; 6-10=10; 11-20=15 and 21 and above=20.

19.12 Questions 8.7- There were no limitations in the application form regarding recognized harbours/ports and processing facilities. As a result, applicants submitted long lists of variously spelt or misunderstood options (e.g. vessel names). On reconsideration, the information provided was summarised as 188 combinations of harbours and 625 processing facilities. At the time, given the limitations of the information provided by the FRAP system, the Delegated Authority made the decision to score only harbours and not processing facilities for the period 2006-2020, which changed the maximum possible score from 96 to 45. On appeal, I have included processing facilities in the calculation, and I extended the period under consideration from 2006-2020 to 2006-2021. I scored each of the 16 years out of 3 for harbours and 3 for processing facilities, where the highest scoring option listed is used, thus a possible maximum score of 96 (3+3*16). Each area was scored as follows: "3 points to PE, Cape St Francis and Mossel bay, 2 points for rest and score 1 for Cape Town, Hout bay, Kalk bay, Kommetjie, Gordons bay. If you have more than one harbor per year, the harbour with the highest score needs to be added to the total for the question. If there is more than one with the highest value, only one value needs to be added". Therefore, I upheld the ground of appeal that this question was to be calculated out of 96 and I ensured that all applicants were reassessed based on a total of 96 points for question 8.7.

19.13 Question 8.8- As with question 8.7, applicants had to list the port(s) and processing facilities where their catch is to be landed and processed. The information provided by each applicant was summarised as 113 combinations of harbours and 510 processing facilities. At the time, given the limitations of the data provided by the FRAP system, the Delegated Authority again scored only harbours and not processing facilities for the period 2006-2020 which changed the maximum possible score from 18 to 45. This calculation was revised to include processing facilities. The information provided per applicant was processed to ensure that the planned future frequency of use for all the harbours listed by each applicant totalled to 100%. This methodology was also used for processing facilities. As such, each applicant was scored with a maximum of 3 for future harbour use and 3 for future processing facility, thus a possible maximum of 6 which was multiplied by 3 to reach a maximum score of 18 (3+3*3). Each harbour/processing facility was scored as follows: "3 points to PE, Cape St Francis and Mossel bay, 2 points for rest and score 1 for Cape Town, Hout bay, Kalk bay, Kommetjie, Gordons bay. If you have more than one harbour per year, the harbour with the highest score needs to be added to the total for the question. If there are more than one with the highest value, only one value needs to be added". I therefore upheld the ground of appeals that this question was to be calculated out of 18 points and all applicants were reassessed based on a total of 18 points for question 8.8.

19.14 Question 9.1- Consideration was given to the amount applicants have invested in vessels, marketing, and fish processing. Investment per ton was calculated as the sum of fixed assets over the financial years. The DA's GPR records that the calculations were based on all investment reported (FY2017 to FY2021) and total hake allocation for the period 2006-2020. On reflection the inclusion of FY2021 means the investment by new Right Holders who were allocated a catch exemption could be recognised (n=3). Therefore, the hake allocation was then summed to include 2021 and then normalised by scaling to the maximum investment per ton and multiplying the result by 100. Section 9.1 was only scored for applicants in category A.

19.15 Question 10- Any other general grounds of appeal. Appellants argued that the FRAP process was designed to exclude micro and SMMEs from the hake sectors and the methodology of the Delegated Authority scored and weighed new entrant applicants prejudicially.

19.16 The Delegated Authority responded that together with the assistance of the Hake Longline Assessment team, consideration was had to the sector and its relevant policies, including the 2021 General Policy and the Sector Specific Policy which informed the decisions on the weightings and scoring criteria.

19.17 Furthermore, the Sector Policy states under section 14 with regards to New Entrants: "Whilst being mindful of the dynamics of the sector that were established under the previous long-term rights in respect of investment, performance, economic stability and business growth, the Department will consider the inclusion of new entrants to comply with section 2 Objectives and Principles, as well as section 18(5) of the MLRA of the Department. New entrant applicants will have to demonstrate that they have knowledge, skills and capacity to fish and process hake. However, it shall be noted that there is limited room to accommodate New Entrants in this fishery."

19.18 The Delegated Authority thus assessed applicants in accordance with the methodology set out in the General Published Reasons for the Decisions on the Allocation of 2021/22 Fishing Rights and Quantum in the Hake Longline Fishery (GPR), and in balancing the objectives of the MLRA and policies.

19.19 I note that the Hake Longline fishery is unique and that a delicate balancing exercise is required to meet the objectives of the MLRA, including transformation, sustainability, and job security.

Access to Information

20. Several appellants alleged a lack of access to information and/or reasons to verify their scores.

21. In the relevant Regulation 5(3) reports, the Delegated Authority responded that in the release of information, the Department has complied with the provisions of PAIA and POPIA. The POPIA Act prohibits the Department from sharing third-party confidential information and details without their consent. Applicants were able to request further information as per the process set out in the Delegated Authority's GPR, in accordance with PAIA and POPIA. I note that spreadsheets were made available on the Departmental website to assist applicants with understanding the scoring

methodology used. The Appellant was also able to request further information via CSCapplications@dffe.gov.za as stated in the GPR.

22. I note that section 32 of the Constitution of the Republic of South Africa, 1996, affirms the Appellant's right to access information held by the State.[2] The Promotion of Access to Information Act 2 of 2000 (PAIA) gives effect to the constitutional right of access to any information held by the State and enables a person to fully exercise and protect all of its rights.

23. The 2021 General Policy[3] and the GPR under section 6 on page 16 give provisions for access to information. The GPR stipulates that every applicant will receive: a notification letter informing the applicant of the Delegated Authority's decision, together with the reason for that decision and the manner in which Appeals must be submitted; a scoresheet indicating the applicant's score; access to the electronic copy of the General Published Reasons. Furthermore, the GPR sets out provisions for accessing other applicants' information by using PAIA. The GPR also prescribes provisions and conditions upon granting access to information for the other applicants' applications.

24. I note that subsequent to releasing the GPR, the Delegated Authority also addressed notification letters to applicants informing them that they may the scoresheets used to record the assessment of every application in the fishery at the Department's Offices, Foretrust Building, Martin Hammerschlag Way, Foreshore, Cape Town on the Departments FRAP online system.

25. The Department published on its website the relevant score sheets and quantum allocation methodology formulae, albeit in a redacted format, so as to comply with the POPI Act. Considering all this information I find that applicants were indeed provided with all the necessary information and data, in order to determine whether they have, in fact, been correctly scored and whether quantum/effort has been allocated in a reasonable and correct manner. They received a notification letter informing each applicant of the Delegated Authority's decision on their application, together with the reason for that decision and the manner in which Appeals must be submitted.

---

[2] Section 32 of the Constitution of the Republic of South Africa 1996.
[3] Clause 9.

26. This together with the GPR and the information published on the Departments website appears to be sufficient and reasonable. Appellants were also able to lodge and canvass detailed appeals on their scoring issues undertaken by the Delegated Authority.

27. Furthermore, if an applicant wanted to access application forms of other applicants, they should have taken further steps to request requested such further information in terms of the procedures and provisions of the PAIA, including an appeal in respect of such information granted by the relevant information officer, that it was still dissatisfied with. I accordingly dismissed this ground of appeal.

28. However, I noted that some of the calculations on certain questions was limited/ not clear to the reasonable person. In the spirit of transparency and fairness, detailed explanations of scoring on the relevant questions have been provided in this Appeals GPR. I note that this Appeals GPR only seeks to address overarching issues that apply to several of the appeals as categorised above. Scoring issues on specific questions by individual entities requires that this document and the calculation formulae explanations provided herein, must be read together with individual Appeal Decisions.

OUTCOMES OF THE DELEGATED AUTHORITY

29. The Delegated Authority in awarding rights in this sector recorded the following in the GPR at paragraph 9.3:

Quantum allocation in the Hake longline considered the broad starting principles as stated in the Policy on the Allocation and Management of Commercials Fishing Rights in the Hake Longline Fishery: 2021 sector specific policy, mainly an attempt to balance broadening access to the fishery through the introduction of the new entrants against improving the allocation to the smaller Right Holders to facilitate their meaningful participation in the fishery throughout the value chain while attempting to minimize negative impact on the industry.

30. The Delegated Authority's decision on allocation of Hake Longline rights was: "guided by the General Policy on the Allocation of Commercial Fishing Rights: 2021 and the advice provided by several Assessment Team members. The reasons for exclusionary criteria (improver lodgement,

material defects and non-utilization) have been deal within the General Policy on the allocation of Commercial Fishing Rights: 2021; the Policy on Allocation and Management of Commercial Fishing Right in the Hake Longline Fishery: 2021. A minimum score of 55% for Category A; 80% for Category B and 70% for Category C on the Balancing Criteria was set to determine the successful applicants.

31. This resulted in 22 new entrants in the Hake Longline sector ie. 7 in Category B, 15 in Category C.

31.1 Category A

The Delegated Authority received 105 applications from Category A applicants, and 67 successful Category A applicants were awarded rights. 68 Appeals were lodged by Category A applicants.

31.2 Category B

The Delegated Authority received 129 applications from Category B applicants and 7 successful Category B applicants were awarded rights. 82 Appeals were lodged by Category B applicants.

31.3 Category C

The Delegated Authority received 212 applications from Category C applicants and 15 Category C applicants awarded rights. 132 appeals were lodged by Category C applicants.

32. After setting aside the quantum for successful Category A's, B's and C's; the Delegated Authority distributed 12% of the remaining TAC quantum across 61 of the successful category A right holders, using a quantum ranking.

33. This resulted in 79.89% of the total HLL quantum being allocated among successful Category A right holders; 18% of the total HLL quantum being allocated to new entrants (Category B and C) and 2.11% of the total HLL TAC remained and this was reserved for appeals.

34. The Delegated Authority notes under section 10 of her GPR that the allocation of fishing rights is subject to the correctness of the assertions made and the information submitted by the applicants and the performance reviews. Furthermore, that the right and/or quantum and/or effort allocated

by her may be reduced or increased in the manner and circumstances set out in the GPR, including the appeals process.

OUTCOME OF THE APPEALS

35. There was a total of Two Hundred and Eighty (280) appeals in this sector. Below is an overview of the outcome:

34.1 Category A

Eight (8) entities scored higher than the 55 % threshold on appeal and are eligible to be allocated rights. One (1) entity successfully appealed its categorization as a Category B. Its application was reconsidered as a Category A applicant, and it scored above the 55% threshold. The total number of successful applicants in Category A increases from sixty seven (67) to seventy – six (76).

34.2 Category B

Three (3) entities scored above the 80% threshold of 80% for Category applicants, after the recalculations of scores on appeal. To ensure, among other, stability in the sector, to promote transformation in the industry and to promote middle-smaller entities, I have decided not to revoke any rights and instead to reduce the threshold for Category B applicants from 80% to 76.73%, this being the lowest ranking appeal score of the entity that was awarded a right by the Delegated Authority. On this approach, an additional two (2) Category B applicants score above the threshold on appeal. This will bring the total number of right holders in Category B from seven (7) to nine (9).

34.3 Category C

13 out of the 15 entities that were allocated rights by the Delegated Authority scored more than the 70% threshold for category C applicants after the rescoring on appeals. To ensure, among other, stability in the sector, to promote transformation in the industry and to promote the middle-smaller entities, I have decided not to revoke rights in the sector and to reduce the threshold from 70% to 68,66%, this being the lowest ranking appeal score of the entity that was awarded a right under the Delegated Authority. Six (6) additional applicants scored higher than this threshold on appeal, bringing the total number of rights holders in Category C from fifteen (15) to twenty-one (21).

REVISED CALCULATIONS

36. Where I upheld the grounds of appeal relating to the calculations of the Delegated Authority that had either been incorrectly calculated or the incorrect formula applied for the scores, I did the following:

35.1 To ensure that I achieve a fair and consistent outcome, the calculations of all the applicants in the sector was revised. It was important to revise all the calculation based on the correct formula to ensure that a like-for-like comparison between the applicants per category could be achieved.

35.2 The revised calculations revealed that there was no material impact on any of the applicants in the sense that none of the successful entities were prejudiced.

35.3 Importantly, the revised calculations are separate from the method used to calculate the quantum.

QUANTUM ALLOCATION METHODOLOGY (QAM) ON APPEAL

37. I note the rationale of the Delegated Authority and the balancing of considerations undertaken in adopting the quantum allocation methodology and the allocation of rights that was undertaken per the FRAP, specifically in homage to the General Policy and the advice of the Assessment team.

38. On appeal I have decided to adopt the same Scoring Methodology of the Delegated Authority which seeks to achieve and balance all of the objectives under the MLRA, specifically:

38.1 The desirability of multi sector involvement, facilitating participation through the value chain;

38.2 The need to minimise negative impacts on the fishing industry, including instability or disruption of existing participation in job creation, and minimising job losses;

38.3 The need for sustainable development of the natural resource through, among other, the determination of the Total Allowable Catch (TAC) and/or Total Applied Effort (TAE); and

38.4 The need to address the dynamics of each specific fishery.

39. To ensure that existing levels of transformation are not jeopardized, implementing a responsible process of transformation, increasing the sustainability of the middle-smaller entities and protecting jobs within the sector and associated industries, I have decided to adjust the thresholds of the Delegated Authority as follows: The threshold of 55 % for Category A will remain the same; the threshold for Category B applicants is adjusted from 80% to 76.73%, and the threshold for Category B applicants is adjusted from 70% to 68,66%, on the Balancing Criteria.

40. Paragraph 4.3 of the Grant of Right letters advised right holders that the TAC "may be reduced or increased, in the manner and circumstances set out in the GPR and after reserved decisions, appeals and reviews have been finalised".

41. To facilitate the admission of additional category A applicants and additional new entrants into the sector, I redistributed TAC as follows:

41.1 TAC allocated to Category A right holders had to be reconsidered to ensure that there is an equitable distribution of the resource, and that the TAC limit for HLL is not exceeded;

41.2 The minimum allocation was increased from 0.1071% to 0.1165%. Only one category B right holder received less than the new minimum allocation under the DA. I accordingly adjusted this right holder's TAC to the minimum allocation and awarded all newly successful category B and C applicants the minimum allocation;

41.3 I reduced the TAC allocated by the DA to successful category A entities, per her decision, which held more than 0.932% (8x the minimum allocation) by 6.5% each;

41.4 I reduced the TAC allocated by the DA to successful category A entities, per her decision, which held more than 0.466% (4x the minimum allocation) by 3.7214%.

41.5 I allocated to the newly successful category A entities, per my appeal decision, their pre-FRAP TAC allocation. I reduced the TAC allocated of those newly successful category A entities, which held more than 0.466% (4x the minimum allocation) by 3.7214%.

41.6 The annexures to this GPR sets out the distribution of the TAC between the different categories and entities.

42. The above Quantum allocation methodology seeks to ensure amongst other, a more equitable distribution of TAC across all right holders, whilst maintaining stability in the sector and promoting small to medium enterprises and transformation.

43. The final list of commercial fishing rights holders in the Hake Longline sector are set out in:

41.1. **Annexure A** (Category A);

41.2. **Annexure B** (Category B); and

41.3. **Annexure C** (Category C).

CONCLUSION

44. This decision will be effective from of the commencement of the 2024 fishing season.

45. Section 80 of the MLRA deems me to be the Appeal Authority over decisions of the Delegated Authority and I have wide appeal powers in terms thereof. I have the power on appeal to award fishing rights, and to overturn the decisions of the Delegated Authority to allocate rights, including decisions related to TAC, where such decision-making is rationale, fair and in line with the provisions of the MLRA and specific policies.

46. Should any appellant be dissatisfied with any aspect of my decision(s), it may apply to a competent court to have this decision judicially reviewed. Judicial review proceedings must be instituted within 180 days of notification hereof, in accordance with the provisions of section 7 of the Promotion of Administrative Justice Act, 2000 (Act No. 3 of 2000) (PAJA).

MS B D CREECY, MP

MINISTER OF FORESTRY, FISHERIES AND THE ENVIRONMENT
