1. PURPOSE

To appoint a Professional Service Provider to develop a National Strategy and Action Plan aimed at Reducing Emissions from Deforestation and Forest Degradation (REDD) for Conservation of Forests, Sustainable Management of Forests and Enhancement of Carbon Stocks (+) in South Africa for a period of eighteen (18) months.

2. INTRODUCTION AND BACKGROUND

- 2.1 The role of forests in mitigating climate change was first recognised under the Kyoto Protocol (Article 3), through land use, land-use change, and forestry under the Clean Development Mechanism (CDM). However, the concept of reducing carbon emissions through the reduction of deforestation and forest degradation first came about at the 11th Conference of the Parties (COP11) in Montreal in 2005 (Document FCCC/CP/2005/5, Agenda item 6) and was adopted as an official item of the conference. It was only later at the Conference of Parties 13 in Indonesia, 2007 (UNFCCC decision 2/CP.13), that it was formally decided to consider Reducing Emissions from Deforestation and Forest Degradation (REDD) as a way of mitigating climate change, and at COP15 it became one of the most important agenda items (Document FCCC/CP/2009/11, agenda item 7(E); UNFCCC decision 4/CP.15). Later it evolved to being REDD+, to include conservation of forests, sustainable management of forests, and enhancement of forest carbon stocks.
- 2.2 The simple idea of REDD+ is for developing countries to reduce emissions (or increase removals) by reducing deforestation and forest degradation and conserving and sustainably managing forests, with the financial assistance of developed countries. In return, developing countries obtain REDD+ credits, which can be included in their own climate change mitigation efforts and which countries can be incentivised for. However, it is important to emphasise that REDD+ is not an offset mechanism.
- 2.3 South Africa has taken a progressive approach in its response to climate change. Following the early ratification of the Kyoto Protocol, the country published a National Climate Change Response White Paper in 2011 and has gradually developed a substantial foundation on which to base future policy and measures. A particular opportunity that has been identified is the implementation of a national program aimed at reducing emissions from deforestation and forest degradation (REDD+).
- 2.4 Based on the initial analysis in the National Terrestrial Carbon Sink Assessment (DEA 2013), an interim Interdepartmental REDD+ Consultative Task Team (IRCTT) was established between the then Department of Agriculture, Forestry and Fisheries (DAFF) and the Department of Environmental Affairs (DEA), who commissioned an initial REDD+ Readiness Assessment Study (DAFF 2017). The

outcomes of the study and subsequent expert consultative workshop identified the clear need to progress with the development of several key elements (Figure 1) as well as pilot areas, to be able to move towards the development and implementation of a national program in an effective, pragmatic, and efficient manner.

Figure 1: The sequence in which 16 elements will need to be developed and the links between each of the components.

3. OBJECTIVES

- 3.1 The main objective is to develop a national strategy and action plan aimed at reducing emissions from deforestation and forest degradation (REDD) for the conservation of forests, sustainable management of forests, and enhancement of forest carbon stocks (+) in South Africa for a period of eighteen (18) months.

4. SCOPE AND EXTENT OF WORK

- 4.1 The appointed service provider will assist DFFE in developing a national strategy and action plan aimed at reducing emissions from deforestation and forest degradation (REDD) for conservation of forests, sustainable management of forests, and enhancement of forest carbon stocks (+), as guided by the framework attached in Annexure C of this TOR.

5. EXPECTED DELIVERABLES / OUTCOMES

5.1 On commencement, during the execution, and upon completion of the assignment, the following deliverables are expected from the preferred service provider:

5.1.1 PROJECT INCEPTION

- The objective of this task is for the entire project team to participate in a project inception meeting to agree on project tasks, deliverables, and timelines.
- **OUTPUT:** An inception report submitted by the appointed service provider two (2) weeks after the purchase order issued and inception meeting with the Project Steering Committee.

5.1.2 LITERATURE REVIEW

- The objective of this task is to undertake a literature review of REDD+ by providing the origin of the concept (including the evolution of REDD+, the regional and international experience); REDD+ in South Africa's context, South Africa's Journey towards REDD+; and what process will be followed to formulate National REDD+ Strategy and Action Plan for South Africa.
- **OUTPUT:** Literature Review report documenting REDD+ originality, relevance, and formulation process of it in South Africa.

5.1.3 GUIDING FEATURES OF SOUTH AFRICA'S NATIONAL REDD+ STRATEGY AND ACTION PLAN

- The objective of this task is to provide the strategic direction (i.e., vision, mission, principles, and implementation approach); overview of the financing mechanism, Forest Reference Emission Level (FREL)/ Forest Reference (FRL), Forest Carbon Trust Fund, and existing policy and institutional arrangements, amongst others, in the context of REDD+.
- **OUTPUT:** Guideline report indicating features of South Africa's National REDD+ Strategy and Action Plan.

5.1.4 REVIEW OF LAND USE CHANGE AND KEY DRIVERS OF DEFORESTATION AND FOREST DEGRADATION

- The objective of this task is to critically review the existing study reports to assess land use change, land use change drivers, and major drivers of deforestation and forest degradation in all ecological zones of South Africa such as Afro-temperate /Afromontane, inland, high mountains, coastal zones, amongst others.
- **OUTPUT:** Review report documenting land use change and major drivers of deforestation, and forest degradation in South Africa

5.1.5 **STRATEGIC OPTIONS AND KEY INTERVENTIONS**

- The objective of this task is to prioritize the drivers in all physiographic zones and propose strategy options and key interventions that will address the drivers of deforestation, and forest degradation, and enhance sink potentiality through sustainable management of forests (SMF), conservation of forests, and enhancement of forest carbon stocks (REDD+).
- **OUTPUT:** Strategic options and key interventions guide for REDD+ in South Africa.

5.1.6 **COST-BENEFIT ANALYSIS**

- The objective of this task is to conduct a trade-off analysis of REDD+ strategy options, including opportunity, investment, transaction, and abatement including estimating the unit cost of avoiding deforestation and forest degradation.
- **OUTPUT:** Cost Benefit Analysis report identifying opportunities of having REDD+ strategy and unit cost of avoiding deforestation and forest degradation in South Africa.

5.1.7 **MONITORING AND EVALUATION FRAMEWORK**

- The objective of this task is to develop a comprehensive and cost-efficient MRV system that is suited for the South African context that takes into account the scope, parameters, monitoring intervals, local biophysical, socio-economic, land-tenure and legal contexts as well as existing datasets, standards and processes. The developed MRV system must consider a National Forest Monitoring System, Safeguards, and non-carbon benefits.
- **OUTPUT:** Develop a Monitoring and Evaluation Framework for both the National Forest Monitoring System (NFMS) and the Safeguard Information System (SIS).

5.1.8 **REDD+ RELATED POLICIES AND MEASURES**

- There are national policies that could be aligned with the decisions of the UNFCCC for REDD+; therefore, it will be very important to review and assess these measures more thoroughly and identify gaps that exist and those that may arise from emerging policies. Secondly, review and assess the United Nations Conventions such as the United Nations Framework Convention on Climate Change (UNFCCC), United Nations Convention on Biological Diversity (UNCBD), United Nations Convention to Combat Desertification (UNCCD), and United Nations Forum on Forests (UNFF) alignment relating to forests, the environment, in general, and natural resource management that are considered for REDD+ policies.
- **OUTPUT:** REDD+ Related Policies and Measures Review Report.

5.1.9 **FINANCE AND FUNDING FOR REDD+**

- The objective of this task is to identify sources of funding and financing for the REDD+ programme ex-ante, during, and ex-post funding that could be sourced from the government and multilateral funder(s).
- **OUTPUT:** Potential Financing and Funding Requirements and Assessment Report for REDD+ in South Africa.

5.1.10 CLOSE OUT REPORT AND FINAL REDD+ STRATEGY AND ACTION PLAN UPON COMPLETION OF THE PROJECT

- The objective of this task is to request a close-out report and final REDD+ strategy and action plan upon completion of the project from the chosen service provider.
- **OUTPUT:** Detailed Close Out Report and Final REDD+ Strategy and Action Plan upon completion of the project.

5.2 Certain milestones, as laid out in the table below, are to be achieved by certain dates during the contract term, and at particular locations:
