2. INTRODUCTION AND BACKGROUND

- 2.1. The 2012 Waste Information Baseline report indicated that ninety percent (90%) of the general waste generated in South Africa is being landfilled.
- 2.2. The National Environmental Management Waste Act, Act No.59 of 2008, (NEMWA), as amended, under section 11(4), requires each Municipality to submit its Integrated Waste Management Plan

(IWMP) to the Provincial Member of the Executive Council (MEC) for endorsement and approval by the Municipal Council as well as incorporate the approved plan in the Integrated Development Plan (IDP) of that Municipality.

- 2.3. The South African Constitution of the Republic, 1996 (Act 108 of 1996), under Chapter 2, stipulates that everyone has the right to an environment that is not harmful to their health or well-being and to have the environment protected through reasonable legislative and other measures that prevent pollution and ecological degradation.
- 2.4. The Department of Forestry, Fisheries, and the Environment (DFFE) must support struggling municipalities that do not have the relevant capacity to ensure that waste services delivery can be improved. DFFE is the sector leader for the refuse removal service and must ensure that strategic catalytic interventions linked to the District Municipalities are implemented to realize the district-based Development Model (households receiving waste service).
- 2.5. The District Based Development Model launched by the president in September 2019 calls on all sectors to ensure synchronised planning across all spheres of government. Waste is one of the basic services that has been delivered in an uncoordinated manner over the years.
- 2.6. The National Treasury has approved the use of a Municipal Infrastructure Grant (MIG) to fund the purchase of Specialized Vehicles for waste management. For municipalities to be able to access these funds the MIG requirements still need to be complied with, however, one of the sector-specific conditions is for municipalities to have an IWMP endorsed by the relevant provincial MEC.
- 2.7. The above condition led to a high demand for municipalities to have their IWMPs developed, reviewed, or finalized.
- 2.8. The IWMP aims to improve the quality of life of the people in the municipality by maximizing efficiency in waste management. This includes sorting and separation at source interventions. The waste value chain within the municipal jurisdiction would be planned for and managed through the IWMP.
- 2.9. The waste management system of the municipality, including the management of various disposal facilities, collection, recycling, and reuse opportunities would be analysed and recommendations in the form of the IWMP would be made for implementation.
- 2.10. In 2022 the DFFE revised the IWMP guidelines to include the elements of the Circular Economy, National Waste Management Strategy (NWMS) 2020, and Waste Picker Integration Guidelines. The DFFE seeks to use these revised guidelines to develop the IWMPs on behalf of these municipalities.

3. OBJECTIVES

- 3.1. To ensure that the municipalities identified above have IWMPs valid for five (05) years after completion of this project.
- 3.2. To ensure that the IWMPs are in line with the revised IWMP guideline which incorporates elements of the Circular Economy, NWMS 2020 and Waste Picker Integration Guidelines (The revised IWMP guideline is attached as annexure.
- 3.3. To ensure that the Municipal IWMPs satisfy the provincial waste management office.
- 3.4. To ensure that the IWMPs can inform the improvement of waste management in the municipalities.
- 3.5. To ensure that the IWMPs are not just a desktop study but are also informed by ground truth and consultations with relevant stakeholders.
- 3.6. To ensure that the IWMPs are practical and implementable by the municipalities.
- 3.7. To ensure that the IWMPs assist municipalities to identify other potential available resources to improve waste management.

4. SCOPE AND EXTENT OF WORK

- 4.1. The development of the IWMP should cover all areas within the jurisdiction of Municipalities. The Scope of Work should be aligned with section 12 of the National Environmental Management Waste Act and the revised IWMP guidelines (**attached as Annexure A**). The following activities will be required from the successful bidder.

4.2. PHASE 1:

4.2.1. SITUATIONAL ANALYSIS

- 4.2.1.1 The objectives of the situation analysis will be to analyse and quantify all aspects related to current waste management services and practices carried out by the local municipality to use this information as a basis for future planning. It includes an evaluation of the areas serviced, the waste management services rendered, infrastructure and equipment, their efficiency, cost-effectiveness, operational costs and budget, social and environmental acceptability, compliance with legislation, etc.

4.2.1.2 The specific objectives of the situation analysis should include, but not limited to:

- Determine the generation patterns of categories of waste in the municipality.

- Determine the storage, transportation, and disposal methods of different categories of waste.
- Determine the extent of recycling, reuse, composting, and treatment of Waste and their impact on waste reduction.
- Determine the Waste Management Infrastructure and assess its impact on Waste Management Service delivery.
- Determine the Demographics and Service delivery and identify the gaps.
- Describe and assess the existing waste management systems, services, and practices.
- Determine the budget and expenditure for waste services.
- Establish whether the municipality has an indigent register for poor households.
- Determine the amount of budget the municipality receives for the provision of waste services to indigent households.
- Determine the necessary human resource capacity to effectively implement the plan [Organ of structure (organogram)] for waste management function in the municipality.
- Determine the role of the designated waste management officer (WMO).
- Appraise the services in terms of quantity, quality, legal, social, and environmental impacts, and public acceptance; and
- Determine the management of hazardous and health care risk waste.

4.2.2. GROUND TRUTHING

4.2.2.1. The situational analysis will have to be supported by ground truthing i.e., a purely desktop assessment will not be accepted. Ground truthing must specifically be itemized in the quotation. Initial site visits and investigations should be conducted for a minimum of 5 days covering all waste management issues mentioned in 4.1 above and any other area deemed necessary in achieving a credible IWMP.

4.2.3. POLICY AND LEGISLATION

4.2.3.1. The relevant government policies and applicable legislation should be identified, and the specific requirements must be established and described. Only policies and legislations that are relevant to the identified municipalities about waste services and practices should be identified and applied.

4.2.3.2. Copies of the various policies and legislative requirements must be made available to the municipalities, in hard copy and electronic format.

4.2.4. **DEMOGRAPHICS**

4.2.4.1 Appropriate demographic data should be collected.

4.2.4.2 The service provider must quantify the base population figures to identify human concentrations and calculate population growth rates and future estimates.

4.2.4.3 Existing population distribution: to determine current waste generation rates, future waste quantities, and an estimate of recoverable materials, the service provider needs to identify the socio-economic distribution.

4.2.4.4 Future population distribution: economic growth points, development, and future housing developments must be identified.

4.3. **PHASE 2:**

4.3.1 **GAP AND NEEDS ASSESSMENT**

4.3.1.1 This stage seeks to identify issues, gaps, and needs which must be addressed. The result of this step would be the prioritization of the issues, gaps, and needs identified while aligning them to set targets and objectives. The issues, gaps, and needs are to be analysed and prioritised in order of low, medium, and high categories for implementation in the short, medium, or long term.

4.3.1.2 The service provider must identify gaps and needs from the situation analysis. These gaps and needs should be listed and categorized under suitable categories.

4.3.1.3 Waste management services (entails info on; the number of households receiving and not receiving waste collection, Infrastructure, equipment, areas where waste services are not provided, and challenges).

4.3.1.4 Waste Minimisation and Recycling issues.

4.3.1.5 Social issues.

4.3.1.6 Information issues.

4.3.1.7 Environmental issues.
