CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

SBD 9

6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.
7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
 - (a) prices;

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

1. PURPOSE

- 1.1. To appoint service providers to conduct feasibility studies to determine the optimal economic benefits that communities can derive from Augrabies Biodiversity Economy Node in Northern Cape Province and subsequently develop project-based bankable business plans, within the Branch: Biodiversity and Conservation, for a maximum period of seven (7) months

2. INTRODUCTION AND BACKGROUND

2.1. South Africa's natural capital, in the form of ecosystems, biodiversity and natural resources underpins the economy and wellbeing of society. Over the last twenty years there has been increased recognition of the value of biodiversity in quantifiable economic terms, and its essential role in promoting sustainable development and poverty alleviation. Biodiversity conservation is not only a key issue in the South African environmental arena, but the use of biological resources has been identified as a key economic strategy of millions of rural dwellers in South Africa.

2.2. The National Biodiversity Economy Strategy (NBES) and its implementation plan (Biodiversity Lab Outcomes) has identified, amongst others, the operationalisation of eleven Biodiversity Economy Nodes (BENs) in the nine(9) provinces of South Africa by the year 2030 as key in transforming the wildlife, bioprospecting and ecotourism sector and develop rural economies. Biodiversity Economy Nodes can be described as areas that possess exceptional biodiversity and natural assets, such as protected areas and game reserves, undeveloped and marginal communal areas with some of the most outstanding game experiences and activities. This land parcels have potential for well-developed wildlife, ecotourism and bioprospecting products supported by other sectors such as agriculture, energy, fisheries, forestry etc. BENs are platforms that provide networks to enable market access, skills transfer, creating supply chain linkages thereby achieving economies of scale especially for local SMMEs operating within it.

2.3. The process to operationalising a BEN include the pooling together of resources from different stakeholders (NGOs, NPOs, Municipalities, Government entities, Government departments, Private consultants, etc.) and appointing champions to facilitate the alignment of key sector interventions from the different sectors to avoid duplicating efforts, and to ensure that an enabling environment is created

BRANCH: BIODIVERSITY AND CONSERVATION

for node projects to get the necessary support. Consequently, key indicators of a fully-operationalised BEN includes a clearly defined and mapped area, a Nodal Steering Committee with approved Terms of References, BEN champion(s), business plans for wildlife/ecotourism and bioprospecting ventures within the BEN and implementation plans for the BEN.

- 2.4. The department has prioritised Augrabies Biodiversity Economy Node in Northern Cape Province. Below is a brief description of Augrabies BEN:

2.4.1. Augrabies Biodiversity Economy Node in Northern Cape Province

The farm Riemvasmaak, specifically the area named Melkbosrant (Farm no. 498) which belongs to the Community and Remainder of farm no. 497 which belongs to South African National Parks is situated north of the Augrabies Falls within the Augrabies Falls National Park (AFNP), approximately 40km north west of Kakamas in the Northern Cape Province of South Africa. The Riemvasmaak land claim was settled in 1994 which saw the restitution of over 20 000 hectares of land to the Riemvasmaak community. The Melkbosrand area, consisting of the farms or areas known as Hartebeesvlak, Blousyfer and Wabrand that cover the northern side of the Augrabies Gorge and the Augrabies Falls National Park, was deproclaimed by parliament[5], withdrawing it from the national park, with the proviso that it be used for community-based eco-tourism and conservation. Tourism and agriculture are the main drivers for the local economy, however more still needs to be done to grow this markets particularly where community-owned land is concern. Rehabilitation and expansion of the existing grape and orange vineyards, hunting, establishment of a solar plant, construction of a suspension bridge within the National Parks etc are some of strategies identified to address the socio-economic challenges faced by the community.

- 2.5. By undertaking of this project, the DEFF will be able to determine the maximum contribution the area might have towards the attainment of the Department's vision to ensure the sustainable utilisation of biological resources by communities to sustain their livelihoods.

BRANCH: BIODIVERSITY AND CONSERVATION

3. OBJECTIVES

To identify and appoint suitable and qualified service provider(s) who will assist DEFF in conducting feasibility studies to determine the optimal economic benefits that communities can derive from Augrabies Biodiversity Economy Node in Northern Cape Province and subsequently develop project-based bankable business plans, initiate engagements with potential investors and set-up governance structures for the respective community-owned enterprises, within the Branch: Biodiversity and Conservation, for a maximum period of seven (7) months

4. SCOPE AND EXTENT OF WORK

The situational study should consider studies that have been undertaken previously.

4.2. FEASIBILITY STUDY

The feasibility study should include but not limited to the following:

- **A strategic planning context** - this requires a description of how the proposed projects within the BEN will support the current development priorities within the Protected Areas which is an anchor for a BEN, the economy at a Municipal and the Provincial level. The projects must be contextualised within the relevant Integrated Development Plans and other applicable planning frameworks, where they exist.
- **A legal and site review** - This must confirm the institution / community's rights to tenure and rights to enter into agreement for the identified projects amongst other consideration.
