## **1. PURPOSE**

- 1.1 The Marine Living Resources Fund (MLRF), as the holder of the Environmental Authorisation (EA) for the Saldanha Bay Aquaculture Development Zone (ADZ) must appoint a suitably qualified and experienced service provider as an independent Environmental Control Officer (ECO) for the sea-based ADZ's construction and operational phases of the development located within Saldanha Bay Municipality in the Western Cape, in compliance with the stipulations outlined in the EA and the Environmental Management Programme (EMPr), for a period of four (4) months.
- 1.2 To ensure that the mitigation/rehabilitation measures and recommendations referred to in the Saldanha Bay ADZ EA are implemented under the provisions of the ADZ EMPr and that conditions stated therein are fully adhered to.

## **2. INTRODUCTION AND BACKGROUND**

- 2.1. An ADZ is an area that has been earmarked specifically for aquaculture activities with the purpose of encouraging investor and consumer confidence; creating incentives for industry development, to provide marine aquaculture services; manage the risks associated with aquaculture; as well as to provide skills development and employment for coastal communities. The development of ADZs supports the Policy for the Development of a Sustainable Marine Aquaculture sector in South Africa (2007) aimed at creating an enabling environment that will promote growth and sustainability of the marine aquaculture sector in South Africa, as well as to enhance the industry's contribution to economic growth.
- 2.2. Saldanha Bay is the primary area for bivalve production in South Africa, with the majority of oyster and mussel production to date originating from the bay. As a result of improved opportunities for local mussel import substitution, the opening up of export markets for oysters, and improved access to water and land space through the Oceans Economy Operation Phakisa initiative, there has been a continued interest in expanding and optimally utilizing the bay for further oyster and mussel production, as well as exploring potential for finfish production in the outer more exposed parts of the bay.
- 2.3. To manage the bay holistically and create an enabling environment, the MLRF undertook an Environmental Impact Assessment (EIA) for the establishment of an ADZ in Saldanha Bay in 2016/2017 and the EA (Appendix A) was granted on the 8<sup>th</sup> January 2018. Appeals against the

1

authorisation were lodged to the “then Minister of Environmental Affairs” and the authorisation was upheld as per the appeal decision dated 7<sup>th</sup> June 2018.

- 2.4. One of the key conditions of the EA and EMPr (**will be made available on request**) was the need for the holder of the authorisation to appoint a suitably qualified and experienced independent Environmental Control Officer (ECO) that will have the responsibility to ensure that the mitigation / rehabilitation measures and compliance recommendations are implemented and ensure compliance with the conditions contained in the EMPr.

### 3. **SCOPE AND EXTENT OF WORK**

- 3.1. The appointed service provider, as an independent ECO, will be expected to perform the following duties:
- 3.1.1. Liaise between the MLRF, operator appointed ECO's and Designated Environmental Officers (DEO), relevant authorities, the aquaculture operators and other lead stakeholders on all environmental concerns.
- 3.1.2. Oversee that the environmental monitoring is in accordance with the EA, EMPr and Sampling Plan.
- 3.1.3. A Condition of the EA is the establishment of two (2) management bodies, namely the Aquaculture Development Zone Management Committee (AMC), an intergovernmental forum aimed at overseeing, facilitating, managing, advising and monitoring aquaculture operations in Saldanha Bay ADZ and a Consultative Forum (CF), a multi-stakeholder forum (public, industry and government) aimed at promoting transparency and formal presentation and acknowledgement of public interest, prior to the commencement of the activity. These committees have already been established but need to be managed by the appointed service provider.
- 3.1.4. The AMC meetings are held on a virtual platform every two months. The AMC meetings are held for an approximate duration of five (5) hours per meeting, this equates to two (2) for the period of appointment which will take place on **28 July 2025** and **29 September 2025**. The AMC fulfils a coordination and supervising role and oversees compliance with the EMPr throughout all phases of the aquaculture farming in the ADZ. The CF meetings are held every three months alternating between Saldanha Bay and Langebaan at public venues or held at the discretion of the Department. The CF meetings are held for an approximate duration of five (5) hours per

meeting, with the last meeting held in May 2025 there will be one (1) meeting during the period of this appointment and the meeting will be held virtually. The responsibility of the CF is to consider and comment on the environmental monitoring data, advise on ADZ management and make recommendations to the AMC. The CF will provide feedback to the AMC through the outputs (recommendations and advice) for the AMC's consideration. The ECO is required to perform secretariat duties for both committees as outlined below:

- 3.1.5. Perform secretariat duties for the AMC and CF by arranging meetings, printing documents (if a physical meeting is held i.e. progress meeting agendas and minutes), archiving and filing all documents on the Departments Electronic Document Management System (EDMS), reporting back and fulfil the role of rapporteur for both committees. Capturing and summarising the Endangered Threatened and Protected (ETP) species data, beach wash up waste data, as well as biofouling data, and the production data submitted by the operators on a monthly basis in the Farm Monitoring Report (FMR).
- 3.1.6. Preside as the Chairperson of the CF.
- 3.2. Monitor monthly performance of the contractor / farmers (and sub-contractors) and ensure compliance with the ADZ minimum infrastructure guideline and AMC infrastructure approval, EA, EMPr and the site specific EMPrs and associated Method Statements.
- 3.3. Validate the monthly farm monitoring reports submitted by the operators to the ECO through monthly site inspections.
- 3.4. Manage all environmental incidents (spills, impacts, legal transgressions, etc.), as well as ensure that corrective and preventive actions taken in this regard and maintain an incident register which indicate the significance of the incident.
- 3.5. Maintain the public comments register in which all complaints/comments are recorded, as well as action/s taken.
- 3.6. Facilitate and coordinate the resolution of conflicts within the scope of the management of the ADZ.
- 3.7. Conduct monthly site inspections of all operators located in the ADZ on a rotational basis to ensure compliance with the EA and ADZ EMPr. This would include capturing, validating and analysing the production data submitted by operators on a monthly basis recorded in the farm monitoring reports (FMRs) to monitor the production thresholds as per the EA. A site inspection

schedule to be developed which would require travel and accommodation costs to Saldanha Bay for the monthly site visits.

- 3.8. Ensure that monthly ECO inspections and auditing activities consider environmental aspects of the operations relevant to the minimisation of environmental impacts and achievement of environmental goals as stipulated in the EMPr.
- 3.9. Review environmental recommendations contained in the environmental monitoring reports undertaken by suitably qualified specialists and ensure updates to EMPr or Method Statement to address such.
- 3.10. Liaise with the Competent Authority (DFFE) to ensure that all operational monitoring activities provide sufficient, relevant information for the Competent Authority (DFFE) to be assured that aquaculture activities are responsibly managed to minimise impact on the environment. This may require revision of the monthly ECO site inspection template format. Templates will be provided upon request.
- 3.11. ECO to draft monthly ADZ Reports (these include the following reports: ECO Site Inspection Report, Monthly ECO Compliance Report and the Summary ECO Report). Upon appointment, the ECO will commence with updating of stakeholders register and submit these reports to the AMC and Competent Authority (DFFE) of which a summarised version (Summary ECO report) must be submitted to the Consultative Forum (CF) for their noting.
- 3.12. One CF meeting will be held on virtual platforms with prior consultation with and consent from the MLRF and will take place on **04 August 2025**
- 3.13. Project Inception Meeting and Report. Bi-Monthly progress meeting will be held on virtual platforms with the MLRF Project Team. Inception and progress meeting agenda and minutes to be drafted by the service provider and approved by the MLRF Project Manager, meeting recordings to be shared with DFFE project management team on request. Monthly progress reports must be submitted to the MLRF project manager.
- 3.14. The appointed service provider's project team may not change without notification and approval from the MLRF Project Manager and if changes are unavoidable the replacement project team member must have equivalent or better experience and qualifications as per the stipulations of these specifications for the ECO or secretariat with a team member who possesses equivalent or higher qualifications and experience than the team member being replaced.

- 3.15. Facilitation of a hand over meeting and all relevant documents to be catered for in the budget to allow for consistency in the project to the next service provider at the end of the four (4) month contract period.
- 3.16. The following templates will be provided by the MLRF, thus the service provider cannot charge the MLRF for development of the applicable document, but may need to be amended to include the log of the appointed service provider:
- a. Monthly ECO Report
  - b. Monthly Summary Report
  - c. Site Inspection Report

## 7.2 Preferential Points (80/20 system)

- 7.2.1. An evaluation of Price and Specific Goals Preference points on the suppliers, that successfully qualified to this stage of evaluation.
- 7.2.2. **Calculation of points for price** - The Preferential Procurement Policy Framework Act (PPPFA) prescribes that the lowest acceptable bid will score 80 points (for tenders under R50m) or 90 points (for tenders above R50m) for price. Suppliers that quoted higher prices will score lower points for price on a pro-rata basis. Where functionality is set as criteria, only bid proposals that meets functionality requirements will be considered for evaluation on price and specific goals preference points.
- 7.2.3. The 80/20 as an appropriate preference point system will be used in the evaluation and adjudication of this quote. However, it must be extended that the lowest acceptable quote will be used to determine the applicable preference point system as per regulation (Section 3(2)(b) of

the Preferential Procurement Regulations (PPR) 2022, which states: “If it is unclear which preference point system will be applicable, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable proposal will be used to determine the applicable preference point system”. Therefore, either 80 or 90 points, depending on the rand value of the proposal, will be awarded to the suppliers who offers the lowest price, and proportionately fewer points are awarded to those with higher prices.
