1. PURPOSE

- 1.1. To appoint a suitable multi-disciplinary built environment service provider to provide professional services in planning, designing, and construction monitoring for three (3) sustainable recycling facilities and a material recovery facility (MRF) in Kouga Local Municipality in the Eastern Cape Province.

2. INTRODUCTION AND BACKGROUND

- 2.1. South Africa is facing a major solid waste management crisis that requires urgent action from all spheres of government in collaboration with civil society, the private sector, and academia. According to a 2012 World Bank Report, South Africa was identified as the 15th largest generator of waste in the world. Globally, the total amount of municipal solid waste produced in cities (densely populated urban areas) is growing even faster than urbanization is occurring and is likely to almost double by 2025, going from 1.3 billion tons per year to 2.2 billion tons.
- 2.2. South African cities face a dire crisis with landfill space in the country whereby some are expected to run out in six years if drastic steps are not taken to significantly reduce the amount of waste generated and to accelerate recycling efforts. Current estimates indicate that only 10% of the country's waste is being recycled, while uncollected and mismanaged waste contributes to flooding, land contamination, air, and water pollution and leads to serious public health impacts.
- 2.3. Despite there being an enabling legislative environment for South African cities to act, the challenges of inadequate human and financial resources, poor execution, and lack of enforcement of existing regulations and by-laws persist across all metropolitan municipalities. In addition, according to the 2012 World Bank Report, the financial value of the formal South African waste sector (both public and private), which is estimated to be as high as R15.3bn or 0.51 percent of South Africa's gross domestic product (GDP), as well as the economic potential of the waste sector has still not been fully realized.
- 2.4. Operation Phakisa: Chemicals and Waste Economy is aimed at engaging in opportunities that can lead to a reduction of impact on the environment while growing the GDP contribution and creating jobs. The session was attended by various sector stakeholders and high-impact initiatives were identified, that would create new jobs, contribute to GDP growth, and reduce the harmful impacts of chemicals and waste on the economy.
- 2.5. Kouga Municipality (KM)'s mandate is to render integrated community services to enhance community development in general and promote a clean and safe environment. KM's Integrated Development Plan (IDP) addresses environmental protection, social upliftment, and economic growth. KM's IDP also

incorporates elements such as water management, energy efficiency, tree planting, landscaping, beautification, public participation, and institutional arrangement and leadership in the municipality. KM continues to make strides towards managing its climate change-related activities and further seeks to adapt and ensure the resilience of its economy and community to climate events. KM's draft Integrated Waste Management Plan addresses the 4 R's of Reduce, Reuse, Recycle and Rethink. Kouga Municipality is faced with plastic pollution impacting the environment and ocean.

- 2.6. To re-position and rebrand the perceptions, and the social and economic prospects of the municipalities, KM has drawn its mandate from the NDP, NGP, IPP, PDP, and DDP. Their key strategic priorities are as follows:
 - 2.6.1. Institutional building (council, management & Business and Labour);
 - 2.6.2. Economic stimulation (Consultation, Policy, conditions, investment retention);
 - 2.6.3. Community outreach;
 - 2.6.4. Law enforcement and compliance; and
 - 2.6.5. Clean up Kouga towns

3. OBJECTIVES

- 3.1. The main aim of the project is to appoint a suitable multi-disciplinary built environment service provider to provide professional services in planning, designing, and construction monitoring for three (3) sustainable recycling facilities and a Material Recovery Facility (MRF) in Kouga Local Municipality in the Eastern Cape Province.

- 3.2. Humansdorp Kwa- Nomzamo – Humansdorp Landfill site- Construction of a Material Recovery Facility (MRF) with admin offices and training rooms
- 3.3.
